## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 6-11, 15, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Wacker et al.

Wacker et al. shows a rotary atomizer for coating work pieces comprising a rotating bell-shaped plate shaft of a bell-shaped plate for discharging a spray stream of a coating agent, at least one steering air outlet for discharging steering air for shaping the spray stream, a bearing unit 25 arranged in a housing of said rotary atomizer for a turbine with a turbine wheel for driving said bell-shaped plate, and at least one steering air line arranged in said housing opening into said steering air outlet for supplying steering air, wherein steering air line passes axially through said bearing unit via space 308 (Column 13, lines 32-41). Since air passes through space 308, the air mixes with coating material from nozzle 30 and the mixture exits through apertures 36 (see Figure 2). Thus, space 308 provides a steering air outlet in which the air will help shape the spray stream.

### ***Allowable Subject Matter***

Art Unit: 3752

3. Claims 4, 5, and 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Alexander et al. is pertinent to Applicant's invention.
